

April 15th, 2020

Dear Valued Customers,

On June 1st, 2020, USG will be separating Fire-rated Grid from non-fire-rated Grid within its intermediate duty DX[®] family of products; separating DX/DXL[®] intermediate duty products into DX[®] (non-fire-rated) and DXL[®] (fire-rated) designations. In addition, USG intends to price intermediate duty fire-rated Grid at a premium to non-fire-rated Grid. The separation is as follows:

Non-fire-rated	Fire-rated
Intermediate duty	Intermediate duty
DX24	DXL24
DX422	DXL424
DX424 Seismic	DXL424 Seismic
DX216	DXL216

Please contact your USG representative with any questions you may have.

Thank you for supporting USG
